

The Rise of G Dog

GDOG (\$GDOG) is a fun, community-focused cryptocurrency with unique **tokenomics** to fuel its growth. Every hodler is automatically entered into the big **\$GDOG LOTTERY** where prizes are given out at price milestones to randomly selected holders.

SAFU

Most Safest Dog Coin!

TRANSPARENT & HONEST

10 Buy & Sell TAX

\$GDOG aims to grow bigger and stronger than any other member of his dog meme family and this is why he has a 10% fee on buy and sell transactions.

1% of the taxfee is reserved for abused dogs, especially pitbulls as they face systemic, relentless abuse and neglect. They're seen as macho status symbols—they're taunted, abused, used as show pieces—and they pay a heavy price.

2% of the taxfee is distributed amongst our \$GDOG holders with every transaction. All rewards are paid out in stable coins (BUSD)

4% Marketing(4%)

3% liquidity pool - LP Tokens sent to dead dead address

TOPGDOG With A Very Unique Offer!

We believe that utilities offered by memecoins are all fake promises and are designed to create an illusion that you are investing in a coin with utility, while 99% of these coins are never making you any money. We are doing things differently. We have the standard 2% holder rewards like the most memecoins have, but besides that, we have something very unique! All our holders will earn an additional 10% of the NET income of GDOG from any sale of our own brand GDOG FOOD for bigger dogs! With other words ... you will also own a piece of our Dogfood company. We are expecting to launch our brand by the end of this year.

\$GDOG Will Become The Number One Dog Coin In The Meme Space!

TOKEN DISTRIBUTION

MOONMAP

PHASE 1

Hustle training

GDOG was put into Hustle training as soon as he was born by his boss. After days of training it was easy to see he was a natural and so he earned his G license. While he was still just a baby he was being prepared for his first rocket launch to the moon and leave every other dog coins far behind.

PHASE 2

First Mission

After his first kill of the neighbour's cat, he got an offer he could not resist. Becoming the dominating dog in the meme space and making many people rich with the launch of his own token to prove his boss Andrew Tate that he is worthy to be his dog

PHASE 3

Second Mission

After only a couple of weeks while \$GDOG becomes bigger and more powerful, more people are getting onboard of the G Train. GDOG is inspired and determined to go where no dog has gone before and bring his holders with him to blast off once again.

PHASE 4

Refuelling

GDOG expects to reach 5,000 holders and journey half way to the moon before needing to refuel. There have been reports that GDOG is working closely with Andrew Tate's University program to enable refueling in orbit at the half way mark. In the mean time GDOG's team will gather support from Exchanges like Binance, FTX, Kucoin and other exchanges to keep the operation in full flow and spread the word.

PHASE 5

Moon Landing

GDOG expects to reach over 10000 holders by the time he reaches the moon. By this point GDOG will continue to evolve as the community grows so make sure you tag along for the ride and enjoy the wealth growth with GDOG.
